Picado, Jorge (P-CMBR); **Pultr, Aleš** (CZ-KARL-AM)

Entourages, density, Cauchy maps, and completion. (English summary)

Appl. Categ. Structures **26** (2018), no. 6, 1305–1324.

The authors develop certain techniques with uniformities and quasi-uniformities, in the point-free setting, using the traditional entourage approach. This enables them to present a detailed theory of completeness without having to rely on symmetry. This they achieve via the use of what they term a *universal Cauchy map*. *Martin M. Mugochi*
