

## Mensagens do dia 27 de Junho de 2014

=====  
Email de Wil Schilders (27 de Junho de 2014)  
=====

Dear all,

We have posted a new FET proactive topic on Modeling, Simulation and Optimization on the FET pages for new ideas:

<http://ec.europa.eu/digital-agenda/en/content/ideas-new-topics-whats-new-isnt-other-9-topics>

Enclosed is the text in a Word document. It would be good and extremely important if you “like” the idea by clicking on that button, and also post comments to support the idea. To this end, you will need to have an ECAS account, but most probably most of you will have one already.

The deadline for the consultation is next Monday. After that, it seems we need to organize a workshop, but I am in contact with Zoltan Horvath who has visited a FET information meeting yesterday and came back with a lot of extremely valuable advice. He is also in direct contact with FET representatives and a representative from the Hungarian office.

We will keep you updated on the process, but for now the most important thing is to support the idea. You can also ask colleagues from your national networks to support it, so that we quickly generate a high number of “likes”. This is important nowadays.....

Best wishes,  
Wil

Caros colegas,

Recebi esta mensagem da EU-MATHS-IN para a qual solicitava a melhor atenção. Destaco, em particular, para o último parágrafo que apela ao nosso apoio à iniciativa.

Agradecia que divulgassem a iniciativa junto dos vossos contactos

Abraço,  
Adérito

Email de Irene Fonseca (27 de Junho de 2014)  
=====

Caros,

Estou bem a par desta iniciativa. Levei uma delegacao de SIAM a Amsterdam em Novembro ultimo para nos encontrarmos com o Wil Schilders, Volker Merhmmman, Maria Esteban e Mario Primicerio exactamente para discutirmos projectos como este. Chamo a vossa atencao para o facto que o nosso relatorio The Mathematical Sciences in 2025 e citado.

Devemos dar o nosso apoio a esta inicitativa.

abcs,  
Irene

Caros colegas,

Uma última mensagem.

1. Envio o link directo para a proposta da EU-MATHS-IN referida no último email:  
<https://ec.europa.eu/digital-agenda/en/comment/16176#comment-16176>
2. Dou conhecimento (no final) de uma mensagem da Maria J. Esteban que me foi pedido para divulgar:
3. Conto com a participação alargada da comunidade matemática portuguesa na reunião que estamos a promover no encontro nacional da SPM (<http://www.enspm14.spm.pt/pt/>) no dia 15 de Julho de 2014, onde serão apresentados os resultados preliminares dos grupos de trabalho que se criaram em Maio.

Bom fim-de-semana,  
Adérito

Email de Maria J. Esteban (25 de Junho de 2014)  
=====

Dear Adérito,

I would like to let you know, as future national network of EU-MATHS-IN, that our Jobs website is online at the address

[www.eu-maths-in.eu/jobs](http://www.eu-maths-in.eu/jobs)

We believe that the service provided by this website could become one of the very good services of EU-MATHS-IN, but for that we need that job offers from all of Europe come to it regularly, that it becomes a reference for companies and institutes working with industry all over Europe.

The starting of such a website is in general not easy, it has to become known to companies and that can be done only by people or institutions which have contacts with them. The national networks of EU-MATHS-IN should play a very important part in making this service active and successful.

Please make the existence of this website known to all your contacts in your country, both among academics who participate in your network or companies with which you have already established some kind of relation.

Please ask the future members of your network to disseminate this information among their contact companies and institutions also.

Thanks a lot for your collaboration.

Best regards, Maria J. Esteban, in the name of the Board of EU-MATHS-IN
