

On quasi b-metric spaces, quasi-metrizability and bicompletions

SEITHUTI MOSHOKOA

Department of Mathematics and Statistics
Tshwane University of Technology, South Africa
MoshokoaSP@tut.ac.za

The purpose of this presentation is to revisit the bicompletion of a quasi b-metric space. It will be shown that every quasi b-metric space admits a bicompletion which is unique up to isometry.
